Internships & Research Experience

Google, 2022 - present

- Work on video analytic and video content understanding.

Microsoft Research, Summer 2021

- Work on agents that are capable of asking useful questions in language and leveraging external knowledge to solve tasks more efficiently (Publication [13]).

University of Illinois at Urbana-Champaign, 2015 - 2022

- I aim to train autonomous agents in multi-agent systems more efficiently via reinforcement learning (RL). That is, using less time and less data to learn the desired policies. We address the problem in four directions:
  (1) Better representation learning and interaction modeling (Publications [5, 7, 10]).
  (2) Large-scale parallel and distributed training, which largely reduces training time (Publications [6, 8]).
  (3) Improved multi-agent exploration (Publication [9]).
  (4) RL with efficient imitation learning (Publications [11, 12]).

D-wave Systems, Summer 2017

- Work on machine learning with quantum computing.

TSMC-NTU Research Center, 2012 - 2015

- Work on Electronic Design Automation with an emphasis on physical design and design for manufacturing (Publications [1-4]).

Skills

- Programming Languages: Python, C/C++, CUDA, SQL, Matlab
- Deep Learning Platform: Pytorch, Tensorflow
